ABOUT ME

Software Engineering Graduate with practical experience across web development, data science, and AI/data annotation. Passionate about leveraging data and modern web technologies to build practical tools, optimize machine learning models, and solve real-world problems.

EDUCATION

B.S. in Software Engineering

2020 – 2024

[AI-Istiqama University, Sumaila, Kano](#)

WORK & RESEARCH EXPERIENCE

ICT & Teaching Assistant

Mar 2026 – Dec 2026

[Nigerian Defence Academy](#)

- Instruct and assist students in ICT-related coursework, practical computing sessions, and laboratory exercises.
- Support faculty staff with technical curriculum delivery, troubleshooting, and classroom technology infrastructure.

Data Science & Machine Learning Fellow

Mar 2024 – Jul 2024

[Arewa Data Science Academy](#) (Remote)

- Performed exploratory data analysis and data visualization using Python, Pandas, NumPy, and Matplotlib.
- Applied core machine learning algorithms and established automated data processing workflows in Jupyter Notebooks.
- Maintained efficient version control and collaborative codebases utilizing Git and GitHub.

Web Development Intern

Sep 2023 – Feb 2024

[Stem Innovators Lab](#)

- Designed, structured, and maintained responsive front-end user interface components using HTML5, CSS3, and JavaScript.
- Built custom backend logic scripts and integrated web APIs utilizing Python.

PROJECTS

Climate Change Education Web App

Python, JavaScript, HTML/CSS, Git

- Designed and implemented an interactive web application aimed at enhancing climate change literacy for secondary school students.
- Built responsive UI components and backend logic to deliver educational modules and track student progress.
- Deployed the application and conducted usability testing with over 50 local students to refine interface accessibility.

SKILLS & PROFICIENCIES

Languages: Python, JavaScript, SQL, HTML5, CSS3

Frameworks & Tools: PyTorch, Hugging Face, Pandas, NumPy, Matplotlib, Git, GitHub, Jupyter Notebook

Competencies: Data Analysis, Machine Learning, Web Development, Software Engineering

CERTIFICATIONS & HONORS

Associate Data Scientist in Python — DataCamp

100 Days of Code™: Complete Python Bootcamp — Udemy

Galactic Problem Solver — NASA Space Apps

Web Development — CWW Tech Africa

Introduction to Front-End Development — Meta

Version Control — Meta

Writing in the Sciences — Stanford University

Learning How to Learn — Deep Teaching Solutions
